

JC-WISE “My River, My Community” Scheme Workshop and Guided Field Trip to Kam Tin River Catchment

Rivers are considered lifeline of human civilisation. With the abundant supply of water resources and fertile soils, the Kam Tin River Catchment has attracted settlements since the Northern Song Dynasty. This professional enhancement programme is designed to equip teachers and NGO staff with in-depth knowledge of Kam Tin River as well as Hong Kong’s rivers, for guiding the public to appreciate the multiple values of local rivers. During the field trip, participants will visit historical relics along the river including the Bin Mo Bridge (便母橋) and Yi Tai Study Hall (二帝書院). In addition, participants can gain a deeper understanding of ecological functions of the river by visiting wetland at the lower course.
